

Facilitated Mobile Security Workshop

Duration: One Day (8 CPEs)

Instructor: Jerod Brennen, CISSP

CTO & Principal Security Consultant, Jacadis; former Manager, Information Systems Security, Abercrombie & Fitch

Location: Quick Solutions, 440 Polaris Parkway, Suite 500, Westerville, OH 43082

Date: Thursday, April 26, 2012

Registration Link: <http://www.surveymonkey.com/s/MobileSecurityWorkshop>

Workshop Description:

Mobility poses many security-related challenges (anonymous connections, “always on” connections, cleartext network traffic, wireless networks, etc.), most of which are not usually fully addressed. This workshop covers the technical, procedural and administrative solutions available to protect your organization against the risks of mobile computing. It also includes a class exercise to evaluate a real-life mobile computing policy and forensics procedures to capture and preserve evidence from mobile devices.

Workshop topics include:

- The nature and criticality of risks involved in various types of mobile computing
- Risks in using wireless networks and control measures to counter them
- Security steps to protect handheld devices
- Exposures in mobile device applications and appropriate control measures
- Policy, standard, and procedural provisions necessary to counter mobile computing-related risks
- Procedures for mobile device forensics
- Auditing mobile computing environments
- Products and product features that mitigate mobile computing-related risks

Who should attend?

- Auditors
- Consultants
- Information Security Administrators
- Information Security Architects
- Information Security Managers
- Project Managers

Having a fundamental knowledge of networking, network security, and system administration is recommended.

Workshop Details:

- Workshop runs from 9AM – 4PM with 1 hour for Lunch (provided)
- Cost of workshop is \$375 per person, group discounts are available
